DETAILED ACTION***Reissue Applications***

Claim 9 is rejected under 35 U.S.C. 251 as being an improper recapture of broadened claimed subject matter surrendered in the application for the patent upon which the present reissue is based. See *Hester Industries, Inc. v. Stein, Inc.*, 142 F.3d 1472, 46 USPQ2d 1641 (Fed. Cir. 1998); *In re Clement*, 131 F.3d 1464, 45 USPQ2d 1161 (Fed. Cir. 1997); *Ball Corp. v. United States*, 729 F.2d 1429, 1436, 221 USPQ 289, 295 (Fed. Cir. 1984). A broadening aspect is present in the reissue which was not present in the application for patent. The record of the application for the patent shows that the broadening aspect (in the reissue) relates to subject matter that applicant previously surrendered during the prosecution of the application. Accordingly, the narrow scope of the claims in the patent was not an error within the meaning of 35 U.S.C. 251, and the broader scope surrendered in the application for the patent cannot be recaptured by the filing of the present reissue application.

In the 05 April 1993 amendment to the parent application, the applicant added to claims 1 and 6 (renumbered as claim 3 in patent 5,388,260 which was issued from the prosecution) the limitation "removable data storage media". Claim 9 omits the limitation "removable." This omitted limitation broadens the scope of the patent claim 3 in such a way that subject matter that was surrendered during the prosecution of the parent application is recaptured.

Claims 5-9 are rejected under 35 U.S.C. 251 as being an improper recapture of broadened claimed subject matter surrendered in the application for the patent upon which the present reissue is based. See *Hester Industries, Inc. v. Stein, Inc.*, 142 F.3d 1472, 46 USPQ2d 1641 (Fed. Cir. 1998); *In re Clement*, 131 F.3d 1464, 45 USPQ2d 1161 (Fed. Cir. 1997); *Ball Corp. v. United States*, 729 F.2d 1429, 1436, 221 USPQ 289, 295 (Fed. Cir. 1984). A broadening aspect is present in the reissue which was not present in the application for patent. The record of the application for the patent shows that the broadening aspect (in the reissue) relates to subject matter that applicant previously surrendered during the prosecution of the application. Accordingly, the narrow scope of the claims in the patent was not an error within the meaning of 35 U.S.C. 251, and the broader scope surrendered in the application for the patent cannot be recaptured by the filing of the present reissue application.

In the 05 April 1993 amendment to the parent application, the applicant added to claims 1 and 6 (renumbered as claim 3 in patent 5,388,260 which was issued from the prosecution) the limitation "and a controller coupled ..." in such a way that the "controller" was listed as included **within** (included in the list of elements making up) an "automated storage library" (see also discussion of errors on page 5 and 6 of the reissue oath/declaration where the insertion of the "controller" **within** the "automated storage library" was described as an error. Note it may be an error but is an improper error for reissue correction as this limitation was surrendered through amendment during prosecution of the parent, the declaration is still considered valid as at least one valid error remains disclosed).

Claims 5-9 of the current application have the limitations to the "controller" but are worded in such a way that the controller is not specified to be **within** the "library" this is a

Art Unit: 2177

broadening of the claims in respect to this particular element as the controller may with the new wording not only be **within** but also may be "**without**" increasing the possibilities for implementation of the controller element in independent claims 5,7, and 9 thus claims 5-9 are broader in respect to this asset and no other limitation would limit the controller to be within the library.

This broadened element was surrendered in the parent application because the controller was placed within the "automated storage library" of the independent claims 3 and 6 present in the parent application by the above-mentioned amendment. Although functions that are preformed by the "controller" were recited in the before that amendment the fact the functions were preformed in the "controller" and **within** the "automated storage library." Thus the amendment detailed above surrendered the limitation under discussion and the omission of the limitation results in improper recapture.
